Over the past 10 years, every aspect of college operations has This remarkable growth is reflected by the college's revenues, in 2005. As the college moves through its fourth decade, we take

#### 2005 ACHIEVEMENTS:

- The college's new, \$4 million teaching and clinical care site on the St. Petersburg College Seminole Campus opened to patients in September of 2005.
- Faculty recruitment efforts in 2005 resulted in 25 new faculty hires despite a nationwide shortage of dental faculty. This is due, in large part, to the college's strong, nationwide reputation for excellence in dental education and research.
- More than 1,400 applications were received for the 80 openings in the college's entering D.M.D. Class of 2010.

- The college is ranked No. 4 out of 56 dental schools in terms of NIH funding for research in 2005.
- The Class of 2005 achieved a 100 percent first-time pass rate of the Florida Licensure exam.
- One hundred percent of the Class of 2006 passed the NB Part II exam.
- The college's NIH-funded Florida Research Infrastructure Enhancement Plan, spearheaded by the Department of Oral Biology, has helped make faculty scholarship and career development an institutional priority, leading to the goal of developing

Pediatrics

IS NOW

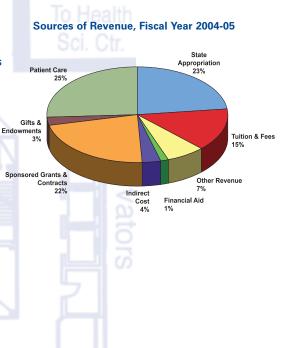

experienced dramatic expansion in both size and complexity. which have doubled from \$26.6 million in 1995 to \$52.7 million this time to reflect on our successes and challenges.

federally-funded, long-term clinical research programs.

 The college created a new Department of Community Dentistry and Behavioral Science in recognition of Florida's growing dental public health needs. This new department has a rich mix of researchers and research interests, adding to the college's portfolio of research and its emphasis on public health.

 Through the Statewide Network for Community Oral Health, the UF College of Dentistry continues to serve as a dental safety net, providing 10 percent of the state's indigent dental services to Florida's most economically and medically vulnerable residents.

 Digital radiography is installed in all college clinics, leading the college one step closer toward the goal of an electronic dental record. Additionally, cutting-edge cone beam computed tomography is now installed in the college's Gainesville radiology suite, enabling 3-D digital imaging of the whole head and neck.

# Educating for

As the state's only public dental school, the college educates Florida's future dentists and dental specialists through its 16 degree and certificate programs. To date, dentistry at UF has graduated 1,940 dentists. The college admitted its first class of 24 students in 1972 and its most recent class of 82 students in August 2005. Advanced and graduate education at the college has produced more than 794 dental specialists. Typically, more than 90 percent of the college's graduates remain in Florida to practice.

**D.M.D. Program.** Each year the college admits a new class of about 80 D.M.D. students consisting of individuals who are among the top pre-dental students in the nation. The class entering in 2005 was selected from 1,060 applicants. The stability of the qualifications of the entering class, even while applications continue to increase, reflects the holistic admission process the college uses in selecting students to prepare for a profession in dentistry.

#### Academic credentials of D.M.D. applicants and enrollees

Academic diedentials of D.M.D. applicants and enfonces

D.M.D students' performance on standardized examinations is a benchmark of the quality of our academic programs. The performance of the Class of 2007 on the NBDE – Part I was ranked 11th out of the 56 participating dental school classes. Concurrently, the Class of 2005 achieved a ranking of 11 out of 54 dental schools on its performance on the NBDE – Part II. During 2004-05, a 100 percent pass rate on the Florida State Board Examination was achieved. Mock boards were introduced to the curriculum in 2002 and have resulted in highly successful outcomes in increasing student performance on the Florida State Dental Licensure Exam.

# the Future

**Student Diversity.** The college strives to achieve multicultural diversity representative of Florida's population—40 of this year's entering D.M.D. students are women, and nearly 40 percent of this year's entering class list themselves as ethnic minorities, as compared to less than 20 percent in the class of 2008. Recruiting minority and disadvantaged students into the D.M.D. program continues to be a priority goal for the college's strategic plan.

### Scholarship Awards 2004-05

#### Marshall M. and Jeannette Butts DeWitt Scholarship Fund

Dental students with financial need who display academic achievement and motivation are eligible to apply for the scholarship. A total of \$90,000 was awarded to 30 students.

#### Andrew Abel Dental Scholarship Fund

Dental students who require financial assistance and display excellence in their academic and clinical endeavors are eligible to apply for the scholarship assistance. A total of \$2,400 was awarded to one student.

#### Krisia and Steve Rhoden Memorial Scholarship Fund

Students in the College of Dentistry, with special consideration to students from the Caribbean nations, including but not limited to Jamaica, are eligible to apply for the Rhoden Scholarship. One student was awarded a total of \$3,100.

#### William T. and Jackie C. Reid Scholarship in Dentistry Fund

Needy dental students with high scholastic averages are eligible for the Reid Scholarship. One student received an award of \$1,988.

## Discovering

The College of Dentistry currently ranks No. 4 among the 56 dental schools in the United States in terms of NIH funding for research. The college is nationally recognized for its oral health research enterprise, emphasizing infectious diseases in dentistry, bone biology, pain and neurosciences, and translational research to improve clinical and dental care. Also flourishing are research efforts in the areas of craniofacial studies, biomaterials, cancer and clinical studies. **Implementation of the Florida Research Infrastructure Enhancement Plan** has greatly enhanced the college's ability to make faculty scholarship and career development an institutional priority. Since the \$2 million National Institute on Dental and Craniofacial Research/National Institutes of Health (NIDCR/NIH) award was made in September 2004, two basic scientists, two clinical/translational research scientists, and one epidemiologist have been recruited as part of the grant implementation. The Pipeline Program, a major component of the plan, which fosters mentored research training for clinical faculty with the goal of competing for independent NIH funding to support long term clinical research programs, currently includes four college faculty members from the departments of oral medicine, oral and maxillofacial pathology, operative dentistry and prosthodontics.

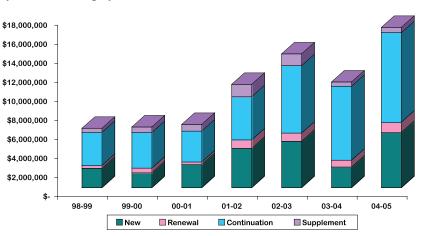

The Dental Practice Based Research Network (DPBRN), is one of three funded nationwide by NIDCR. The 7-year, \$25 million dollar award is expected to fund 16-20 practice-based studies to promote communication, direct research, and enhance education of dentists as well as providing a basis to evaluate quality improvement in dentistry over time. The first of these studies will survey 176 Florida and Georgia dental practitioners on methods used in caries diagnosis, timing of operative intervention and initial and replacement restorations. In studies 2 and 3, 200 dentists from Florida and Georgia will be certified as practitioner investigators to report on patient care. Each of these studies will involve as many as 100 patient/restorative sites per practitioner for a total database of 20,000 restored sites. The University of Florida DPBRN, in conjunction with the University of Alabama at Birmingham, provides coordination and oversight to practitioners in Florida, Georgia, Alabama and Scandinavia as well as Minnesota and Oregon through collaboration with Kaiser Permanente and HealthPartners. For more information, visit www.DentalPBRN.org.

The College of Dentistry has a multi-faceted service mission encompassing patient care and community outreach and education. Through its Statewide Network for Community Oral Health, the college improves access to dental care for Florida's residents, focusing on vulnerable and indigent populations and special needs patients. Through the network, the college has become one of the largest providers of low-cost dental care in Florida, providing nearly 10 percent of all indigent care to Florida's residents, offering comprehensive state-of-the-art clinical services during more than 89,950 patient visits in fiscal year 2004-2005.

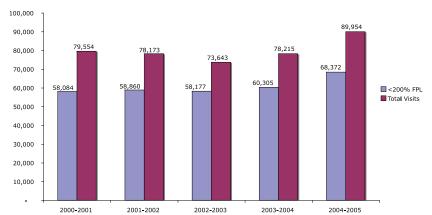

The Statewide Network for Community Oral Health continues to be a unique resource with the goal of providing clinical learning opportunities for dental students and residents while also improving access to dental services to the underserved. The college has expanded the network in 2005 with an educational/clinical partnership with the University Partnership Center on the St. Petersburg College Seminole Campus.

The college's students and faculty also give of themselves during humanitarian service trips at home and abroad. The College of Dentistry sponsored three international educational

and service trips to the countries of Dominican Republic and Yucatan, Mexico last December, and Ecuador in March.

Patient Visits to College-owned Clinics

While the Dominican Republic trip was not affiliated with a foreign university, the Ecuador and Yucatan trips built on academic ties with sister institutions in other countries to broaden the educational experience of UF dental students. The college has established ongoing exchanges with Universidad San Francisco de Quito (USFQ) in Quito, Ecuador and Universidad Autónoma de Yucatan Facultad de Odontologiá (UADY) in Yucatan, Mexico.

USFQ hosted 14 UF dental students early March, pairing them with USFQ students to provide restorative and oral surgery treatment to about 300 needy patients. The December trip to the Dominican Republic included 21 UF dental students who were joined by three private dentists and two dental assistants. The UF mission to Dominica resulted in more than 500 patients, many of who were malnourished children or children with HIV, receiving critical dental treatment. The UF trip to Yucatan, Mexico included two faculty and nine UF dental students who partnered with UADY students to provide treatment to more than 400 children in largely rural and underdeveloped areas.

## Building FOR THE FUTURE

The college's aging physical plant and outdated equipment is one of the college's greatest challenges, but also presents the greatest opportunities. In 2005, the college acquired 6,528 square feet of research space as offices and laboratories within the Dental Sciences Building and 1329 Building occupied by other Health Science Center colleges were returned to dentistry. Most of this space has either been renovated or is in the process of being renovated, but infrastructure problems continue to be an issue.

A footprint for college expansion through the construction of a dental west wing was added to the Campus Master Plan in 2005. Discussions have begun with UF Facilities and Planning and an architectural firm to establish a process for initial visioning and preliminary planning for such a facility. Planning will include developing fundraising strategies to raise money for the new facility during the 7-year University of Florida Capital Campaign, of which the College of Dentistry is committed to raising \$9 million.

UF Trustee Cynthia O'Connell (in blue) and U. S. Rep. C.W. Bill Young cut the ceremonial ribbon signifying the partnership between the UF College of Dentistry and St. Petersburg College with a little help from (left to right) City of Seminole Mayor Dottie Reeder, Dentistry Dean Teresa A. Dolan, SPC President Carl Kuttler Jr., University Partnership Center VP Lars Hafner, SPC Trustee Cecil B. Keene and SPC Provost James Oliver. This \$4-million building project, funding for which was raised through local, state and federal support, opened to patients Sept. 6 and is a 14,000 square-foot, two-story clinic that replaces the college's downtown St. Petersburg dental clinic. This facility more than doubles the college's overall patient care capacity in Pinellas County, with patient visits expected to increase from 7,000 to as many as 20,000 each year.

#### **College Renovations Completed in FY '05**

Project	Program	Amount	Source of Funds
Clinic 1B Renovation	Clinical	\$96,546	AEF & PECO funds
Clinic 1A Renovation	Clinical	\$302,808	AEF & PECO funds

Student Affairs Office Renovation	Educ. Infrastructure	\$4,673	General Revenue
Patient Billing Office	Clinical	\$32,000	AEF
Periodontics Main Offices	College level	\$25,968	AEF
Periodontics Resident Area	Clinical	\$47,798	Foundation
Periodontics Lab Space	Research	\$43,000	College IDC
Grand Total:		\$2,704,192	

#### College Renovation Projects, 2006-2011 as prioritized March 1, 2006.

Project	Estimated cost	Time frame
1. MDL's - renovations and equipment	\$500,000	Summer '06
2. Seminar room, D1-9, renovations and equipment	\$50,000	2006-07
3. Pediatric Dentistry Clinic, renovations and equipment	\$500,000	2006-07
<ol> <li>Graduate Pediatric Dental Clinic, renovations and equipment</li> </ol>	\$750,000	2008-10
5. Graduate Prosthodontics Clinic, renovations and equipment	\$250,000	2008-10
6. Graduate Periodontics Clinic, renovations and equipment	\$750,000	2008-10
7. Renovation of 11th floor. 6000-7500 sq. ft. Contingent on the return of all space to dentistry	\$2,000,000+	2006-08
8. Restrooms throughout the dental tower, renovations	\$1,540,000	2006-11
9. Central Sterilization – replacement of aging equipment	\$750,000	2008-09
<ol> <li>Dental simulation Laboratory – replacement of simulators and AV</li> </ol>	\$900,000	2009-10
Total	\$7,990,000	

### Technology acquisitions

The University of Florida College of Dentistry is one of a handful of dental schools in the nation that formally incorporates several state-of-the-art technologies in its dental curriculum and patient care enterprise. These include:

Digital Radiography. Through a \$2-million federal grant, digital radiography has been installed in all the college's clinics, in Gainesville and across the state. The college is now working to integrate digital radiology files with its Quick Recovery enterprise system using MyPax.

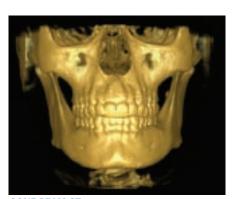

CEREC 3D composite milling systems. The college purchased two CEREC 3D machines, which feature computer-assisted design and manufacturing (CAD/CAM) software and self-contained diamond bur milling units to fabricate crowns, onlays and inlays. Operative faculty instructs third- and fourth-year dental students in using the CEREC 3D, resulting in patients having permanent, long-lived composite crowns placed within one visit of two or three hours rather than during two visits of several hours each.

i-CAT cone beam computed tomography. Through an anonymous donation, an i-CAT cone beam CT (CBCT) machine has been purchased and installed in the college's radiology department. CBCT is state-of-the-art digital imaging technology that provides high-definition 3D volumetric and maximum intensity projection (MIP) images of the head and neck with one-tenth the amount of radiation exposure of a typical medicalgrade CT scan.

Laser Dentistry. The college has signed an agreement with Biolase Technology, Inc. to place six dental lasers in its preclinical lab and in clinics. UF will be one of the first dental schools in the nation to offer laser dentistry in its clinics and curriculum, and the opportunities for research using dental lasers are exciting.

DenX computer assisted implant navigation system. Through donation of equipment, the college's Implant Center acquired a DenX image-guided surgery system. The system uses a complex computerized motion tracking system and digital chart objects to facilitate seamless pre-surgical planning, accurate real-time identification of critical structures during surgery, and precise placement of implants.

**CONE BEAM CT** 

## Honor Roll

During Fiscal Year 2004-05, the College of Dentistry received \$2,308,887 in gifts and donations. Of this amount \$137,150 was for endowments for the future of the college. In addition, the college received approximately \$225,000 for construction and renovation projects. The remainder was for non-endowed college activities. The college also received \$458,991 in state matching funds.

The College of Dentistry has a capital campaign goal of \$9 million. The major activities for this capital campaign will be raising funds for a new wing for the college or a new clinical facility off-site. In addition, the college will continue to raise funds for the General Dentistry Endowment and renovation and construction projects for departments. A final fundraising goal will be the establishment of additional endowed professorships for the college.

This Honor Roll includes the names of all donors to the UF College of Dentistry from July 1, 2004 to June 30, 2005. If your name is not included and you think it should be, one of the following may be the reason it is not:

- The gift was made before July 1, 2004, (and was recognized in a previous report) or after June 30, 2005, (and it will be recognized in a future Honor Roll).
- You made a pledge instead of a gift and planned to fulfill your commitment after June 30, 2005. (Only actual pledge payments made between July 1, 2004 and June 30, 2005 are listed.)
- A personal gift was made using your company's check or letterhead. In this case, you may be listed in the corporate and organization section of the Honor Roll.
- We made a mistake. In spite of our best efforts, errors and omissions occur. If so, please accept our apologies and notify the UF College of Dentistry Development Office, PO Box 100217, Gainesville, FL. 32610-0217. Call 352-273-5779 or e-mail Cathy Jenkins, UFCD director of development at cjenkins@dental.ufl.edu.
