

Florida Tomorrow

College of Dentistry
2006-2007 ANNUAL REPORT

Working today for *better tomorrow*

Message from the Dean

For the University of Florida College of Dentistry, 2006-07 was an eventful year. We experienced unprecedented challenges, tremendous successes and new opportunities that will shape our college for years to come.

A very tough 2007 legislative budgeting session resulted in budget shortfalls statewide. As a result, we have tightened our belts as a university and as a college, and it appears the 2007-08 legislative budget cycle may also be a tight one — resulting in even more dramatic budgetary shortfalls and decreased state support for the college next year.

State support for higher and professional education has been consistently diminishing, and we must constantly strive to improve the efficiencies of our clinical and business enterprises. Simultaneously, we have experienced the greatest demand for dental education in the college's history.

Recruiting and retaining faculty to teach the state's future dentists and providing facilities conducive to learning and patient care is critical. We've made significant headway over the last several years in renovating our outdated classrooms and clinics, but we have much left to do. We're also exploring the possibility of adding a west wing to our existing building to accommodate expansion of the college's D.M.D. program and clinical enterprise — a daunting prospect given the current budget climate.

Yet, the college has been fortunate in the strong private support it receives. One example of that support is the innovative public-private partnership with the Naples Children and Education Foundation, which funded the college's newest community-based clinic to be built on the Collier County campus of Edison College in partnership with CHS Healthcare. This unique collaboration will result in the provision of much-needed dental care to at-risk children and special needs patients in Collier County and will serve as a model for future educational and clinical programs.

Florida Tomorrow, the seven-year capital campaign for the University of Florida, officially kicked-off in 2007 following a two-year silent phase. I'm pleased to report we're well on our way to reaching our goal of \$15 million. The monies raised during the capital campaign will support faculty endowments and continued improvements to our physical plant and programs. Your support for the campaign during this time of diminishing state support is critical to the future of excellence in dental education for our state.

We hope you will join us in shaping our future.

Sincerely,

A handwritten signature in black ink that reads "Teresa A. Dolan".

Teresa A. Dolan, D.D.S., M.P.H.
Professor and Dean

Fiscal Year 2006-07 at a glance

■ Students	455
■ Dental	325
■ Advanced Education (Residents & Fellows)	106
■ Internationally-Educated Dentist Program	24
■ Faculty (full-time)	146
■ Staff (all sites)	282
■ Degree Programs	16
■ Locations	Gainesville, Jacksonville Naples, St. Pete, Hialeah
■ Patient Visits	101, 595
■ Operating Budget	\$57.7M
■ Research Funding	\$13.8M

In 2006, 16 new full-time faculty members were recruited to the college despite a national shortage of dental faculty. In addition, the college's research enterprise was bolstered by the recruitment of seven postdoctoral associates, and the clinical/education enterprise by eight part-time faculty.

FACULTY POSITIONS FILLED FY 2006-07

Tenure/tenure-accruing

Linda Bartoshuk
Community Dentistry & Behavioral Science, Professor

Seunghee Cha
OMFSDS, Assistant Professor

David Culp
Oral Biology, Professor

Josephine Esquivel-Upshaw
Prosthodontics, Associate Professor

Scott Greishaber
Oral Biology, Assistant Professor

Barbara Hastie
Community Dentistry & Behavioral Science, Assistant Professor

Kesavalu Lakshmyya
Periodontology, Associate Professor

Tord Lundgren
Periodontology, Grad. Pgm. Dir., Professor

Rosalia Rey
IEDP, Clinical Assistant Professor

Shannon Pop
Periodontology, Assistant Professor

Ozlem Yilmaz
Periodontology, Assistant Professor

Clinical

Theofilos Koutouzis
Periodontology, Visiting Associate Professor

Christopher Spencer
Orthodontics, Facial Pain, Visiting Clinical Assistant Professor

Thomas Zellmer
Operative Dentistry, SFCC, Clinical Assistant Professor

Research

Biswadip Das
Oral Biology, Research Asst. Professor

Nicole Greishaber
Oral Biology, Research Asst. Professor

Postdoc Associates

Memed Duman
Periodontology, Postdoc Associate

Keigo Ikeda
Oral Biology, Postdoc Associate

Yaling Liu
Oral Biology, Postdoc Associate

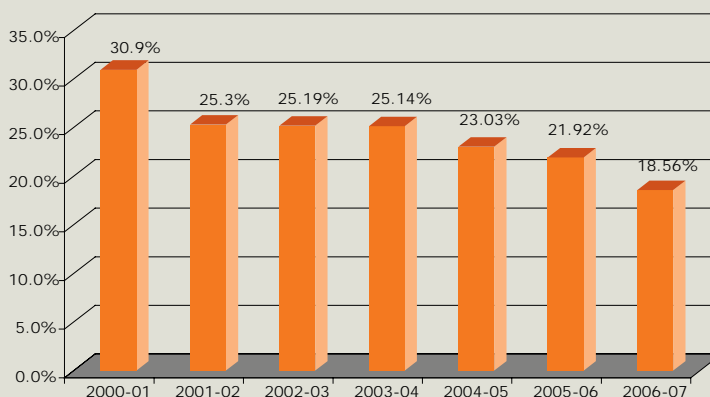

Maria Emilia Oliveira
Oral Biology, Postdoc Associate

Sunethra Rajapaske
Periodontology, Postdoc Associate

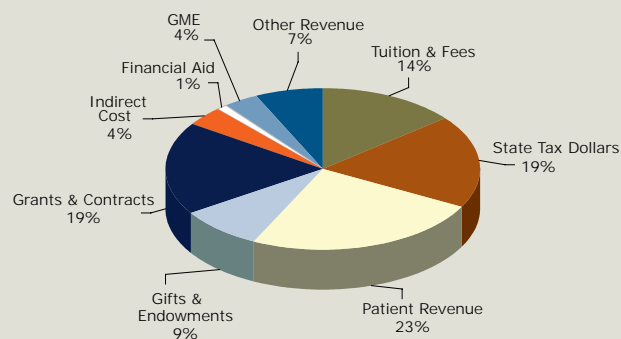

Raj Verma
Periodontology, Postdoc Associate

Luyu Yao
Periodontology, Postdoc Associate

State Support as a Percentage of Total Revenues, FY 2000-01 — 2006-07

Sources of Revenue, FY 2006-07

Florida Tomorrow is *a belief*...

that excellence in dental care demands excellence in scientific discovery, dental care delivery and education

Educating for Tomorrow

Since entering its first class in 1972, UFCD has graduated 2,096 dentists and 910 dental specialists. Typically, more than 90 percent of the college's graduates remain in Florida to practice, and nearly a quarter of the state's practicing dentists are UF College of Dentistry graduates.

During 2006, the college continued its efforts to improve its D.M.D. clinical curriculum through development of a general practice model of care that includes interdisciplinary treatment planning. This has resulted in the launch of screening and multi-disciplinary treatment planning clinics, designed to streamline patient screening and treatment planning for the student clinics. Faculty members from each of the dental specialty areas serve in the treatment-planning clinic as complements to the general dentistry faculty to provide a comprehensive teaching and patient care environment.

These changes are the first significant effort in a major restructuring of the undergraduate clinical curriculum from a specialty-based model to a model of comprehensive general dental care.

D.M.D. Program

More than 1,500 applications were received for the 80 openings in the college's D.M.D. class entering in 2007. This represents a jump in applications of more than 160 percent since 2001, a trend that is in-sync with tremendous growth in the number of dental admissions applications nationwide.

Advanced and Graduate Education

Advanced and graduate education at the college has grown from six programs with an enrollment of 36 in 1979 to 12 accredited programs and four distinct fellowships (16 total programs) with an enrollment of 103 students in 2006-2007. In addition to these 16 programs, two graduate programs are offered in conjunction with other colleges (Interdisciplinary Ph.D. Program; M.S. or a Ph.D. in materials science and engineering with specialization in dental biomaterials, biomimetics, and tissue engineering). In 2006, two of the College of Medicine's Interdisciplinary Ph.D. Program (IDP) students mentored through the Department of Oral Biology received their Ph.D. degrees. Currently, the college has 36 M.S. students and granted 28 M.S. degrees in 2006-07.

D.M.D. Scholarship Awards 2006-07

Marshall M. & Jeannette Butts Dewitt Scholarship Fund: Dental students with financial need who display academic achievement and motivation are eligible to apply for the scholarship. A total of \$87,000 was awarded to 29 students.

Andrew Abel Dental Scholarship Fund: Dental students who require financial assistance and display excellence in their academic and clinical endeavors are eligible to apply for the scholarship assistance. A total of \$2,500 was awarded to one student.

Krisia & Steve Rhoden Memorial Scholarship Fund: Students in the College of Dentistry, with special consideration to students from the Caribbean nations, including but not limited to Jamaica, are eligible to apply for the Rhoden Scholarship. One student was awarded a total of \$7,000.

William T. & Jackie C. Reid Scholarship in Dentistry Fund: Needy dental students with high scholastic averages are eligible for the Reid Scholarship. One student received an award of \$6,900.

Florida Tomorrow is *a place...*

where all Floridians have access to dental care

Serving People Today

Through the Statewide Network for Community Oral Health, the college extended low-cost dental care to Florida's vulnerable, indigent and special needs residents. Nearly 75 percent of the college's patient base is at or below 200 percent of the Federal Poverty Level. Through college-owned and partner clinics in the network, the college has become one of the largest providers of low-cost, comprehensive, state-of-the-art dental care in Florida, providing nearly 4.5 percent of all indigent care to Florida's residents during 101,595 patient visits in 2006-07.

The newest addition to the Statewide Network for Community Oral Health (*see map, next page*) was established with the formal private-public partnership between the college and the Naples Children and Education Foundation (NCEF). NCEF donated \$4 million to the college, which received a state match in the amount of \$4 million, for the construction of a world-class pediatric dentistry program and facility on the Edison College campus. The foundation also provided \$1.5 million in support of start up operational expenses for the clinic, which, when it opens fall of 2008, will greatly expand the delivery of clinical services in Collier County to at-risk children.

In addition to service through college clinics, UF dental students and faculty provide free dental care during college-sponsored foreign aid trips each year to the Dominican Republic, Ecuador, Costa Rica, and Honduras. Typically oriented to provide urgent and preventive dental care, these humanitarian efforts serve hundreds of people living in isolated areas under primitive conditions who would not otherwise receive dental care. Students, faculty and private dentists who volunteer to participate come away with an awestruck appreciation for their patients and profession.

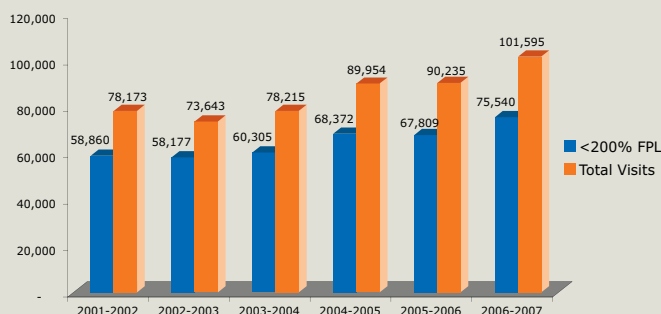

Physical Plant Improvements and Expansion

To better serve the college's education, research and patient care missions, the college continues to focus on the renovation of existing and reassigned space and exploration of the idea of construction for a new west wing expansion. The footprint for a proposed west wing expansion is now included on the university's Campus Master Plan, and development activities are underway to fund preliminary visioning for the expansion with the goal of contracting architectural renderings and construction cost projections. Once this is achieved, the college expects to pursue private and public funding sources for the west wing expansion project.

Restrooms throughout the dental towers, renovation	\$1,540,000	2008-11
Central Sterilization - Replace additional equipment	\$500,000	2008-11
Dental Simulation Laboratory - Replace Simulators & AV	\$900,000	2009-11
TOTAL	\$16,524,219	

Florida Tomorrow is *a day...*

when oral diseases and their impacts on systemic health are widely prevented and easily treated

Discovering for the Future

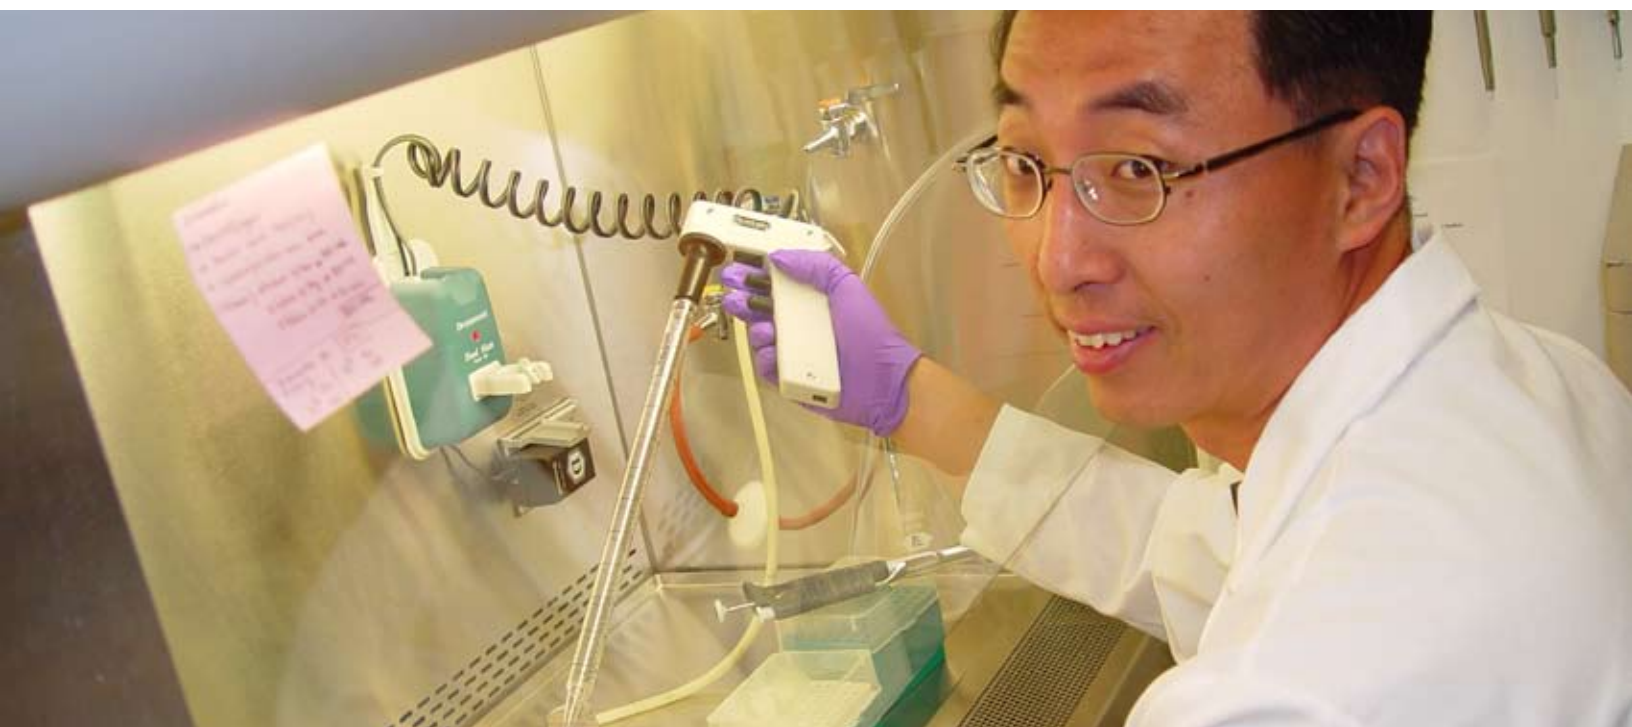

The college is ranked No. 6 of 56 dental schools in terms of federal funding. This marks the seventh consecutive year the college was ranked within the top 10 dental schools receiving federal funding, and fuels a nationally-recognized oral health research enterprise emphasizing infectious diseases in dentistry, bone biology, pain and neurosciences, and translational research to improve clinical dental care.

Recognizing clinical and translational research requires an interdisciplinary mix of people examining the same problems from different perspectives and bringing the most advanced genetic and molecular tools to bear on improving patient health, the college relies on its robust basic science research enterprise as the underpinning on which to build clinical and translational research efforts. With the support of a National Institute of Dental and Craniofacial Research/National Institutes of Health research infrastructure award, the college has recruited seven new research faculty and has developed a faculty research pipeline program to mentor clinical faculty in preparation for submitting competitive grant applications.

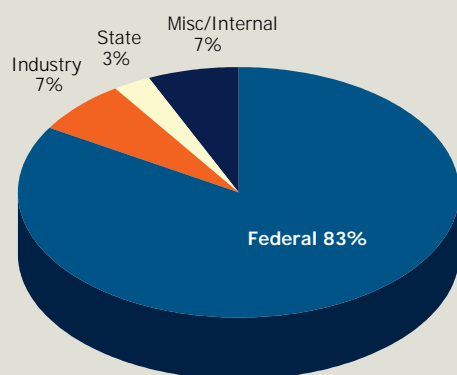

This strategy strengthens ties between the college's research on systemic and oral diseases and the genetics and diabetes research underway elsewhere in the Health Science Center. It builds "critical mass" within the department of oral biology's areas of infectious diseases, molecular immunology and cell biology and enhances the college's research activities in the areas of health disparities, caries, periodontal diseases, oral cancers, xerostomia, and pain.

Florida Tomorrow *and you*

Clark Hodge receiving his Honorary Fellowship award from AA&F president Barry Setzer.

Investing in the Future

What is Florida Tomorrow for the University of Florida College of Dentistry? Florida Tomorrow is about all the ways the college is changing the world for the better.

Florida Tomorrow is a belief that we have the responsibility to use teaching, research, and service to solve the greatest oral health challenges of our time and to inspire and nurture the next generation of oral health leaders.

Florida Tomorrow is a comprehensive campaign over the next five years that will raise more than 15 million dollars to impact every aspect of the college's mission to deliver excellence in dental education, research and patient care.

Florida Tomorrow is an opportunity to invest in dreams—dreams that, because of your support for the University of Florida College of Dentistry, are becoming realities.

Campaign Goals	RAISED TO DATE	GOAL
■ Faculty Support	\$3,165,455	\$2,400,000
■ Graduate Support	\$83,519	\$1,500,000
■ Undergraduate Support	\$0	\$1,500,000
■ Campus Enhancement	\$4,187,668	\$6,500,000
■ Program Support & Research	\$3,637,200	\$3,100,000
TOTAL	\$11,073,843	\$15,000,000

"I had the privilege of a half-time teaching appointment at the UF College of Dentistry for seven years. This was a wonderful experience to end my 47-year career in dentistry. In the ensuing years at UFCD, I observed a strong program improve each year as evidenced by the scores on the National Dental Boards and the pass rate on the Florida Dental Board. To help continue the progress made by Dean Dolan and the faculty, my wife and I donated appreciated real estate to endow a professorship. Working with Cathy Jenkins and Bruce Delaney of the UF Foundation guided me through the intricacies of tax law, land transfer and other legal concerns. Donation of appreciated real estate is a viable way to help continue the work of UFCD."

—L. CLARK HODGE, D.D.S., M.S.D., UFCD FRIEND

"Legacy is to leave the wood pile higher than you found it. It is to honor and give to those who have given you so much. Those who have been an 'enabler' in your life. Our College of Dentistry is just that — an enabler for all of us! The marvelous life we now enjoy has been enriched and enabled because of what UFCD provided each of us. Glenda and I are thrilled to be able to 'quid pro quo' — 'To whom much is given, much is expected.' It is an honor we leave a portion of our legacy to our college — the UF College of Dentistry!"

"I am grateful for the abundance in my life, and my dental education has enabled me to have a career and a lifestyle that are fulfilling. I feel it is my responsibility to 'give back' to the UF College of Dentistry for providing that education, because there is no other investment I've made that has yielded a better return than my tuition dollars. I chose to give back by taking out a life insurance policy for \$100,000 and making the college the beneficiary. I know my small annual investment in the policy premium will make a difference for future UFCD students and faculty. Cathy Jenkins made the process so easy, and I urge all UFCD graduates to take advantage of this opportunity to give back."

—WILLIAM MARTIN, D.M.D., CLASS OF 1976

"When I heard the Department of Periodontology was doing a major renovation of the graduate clinics, I wanted to help. One of my residency memories was the operatories we had to use for surgeries. They were small, cramped and inadequate. So, when I was offered the chance to equip one of the rooms for periodontal surgery of all types, I took the opportunity. I decided to pledge \$100,000 over a 5-year period. Now the question was how to pay the pledge. My investment advisory at Smith Barney recommended using some stocks in my portfolio. Due to changes in the stock market, I would have a large capital gains fee if I sold the stock, but by donating it I received a tax deduction for a charitable contribution instead. Therefore, I covered my yearly pledge by turning over some of the stock to the UF Foundation. It is a plan that has worked well for me and could for others too. Ask Cathy Jenkins for help. It is a real win-win way of helping UFCD and your own tax burden as well."

This Honor Roll includes the names of all donors to the UF College of Dentistry from July 1, 2006 to June 30, 2007. If your name is not included and you think it should be, one of the following may be the reason it is not:

- The gift was made before July 1, 2006 (and was recognized in a previous report) or after June 30, 2007 (and it will be recognized in a future Honor Roll).
- You made a pledge instead of a gift and planned to fulfill your commitment after June 30, 2006. (Only actual pledge payments made between July 1, 2006 and June 30, 2007 are listed.)
- A personal gift was made using your company's check or letterhead. In this case, you may be listed in the corporate and organization section of the Honor Roll.
- We made a mistake. In spite of our best efforts, errors and omissions occur. If so, please accept our apologies and notify the UF College of Dentistry Development Office, PO Box 100217, Gainesville, FL 32610-0217. Call 352-273-5779 or e-mail Cathy Jenkins, UFCD director of development at cjenkins@denal.ufl.edu.
