Our Speaker

Juan F. Yepes, DDS, MD, MPH, MS, DrPH is an Associate Professor in the Department of Pediatric Dentistry at Indiana University School of Dentistry, and Attending Faculty at Riley Hospital for Children at Indiana University in Indianapolis, Indiana. His dental and medical degrees are from Javeriana University in Bogotá, Colombia. In 1999, Dr. Yepes moved to the United States and completed a fellowship and a residency in radiology at the University of Iowa in 2002, and a residency in oral medicine at the University of Pennsylvania in 2004. In 2006 he completed a master’s degree in Public Health at the University of Kentucky and in 2008, he completed a residency in Dental Public Health at Texas A&M University, Baylor College of Dentistry. In 2011, he received a doctoral degree in Public Health with emphasis in epidemiology from the University of Kentucky, and in 2012, he completed his residency training with a master’s degree in pediatric dentistry from the University of Kentucky.

Dr. Yepes is board certified by the American Boards of Pediatric Dentistry, Oral Medicine and Dental Public Health. He is an active member of the American Academy of Pediatric Dentistry, American Academy of Oral Medicine, American Academy of Oral and Maxillofacial Radiology, American Association of Public Health Dentistry, Indiana Dental Association and American Dental Association. Dr. Yepes is also a Fellow in Dental Surgery from the Royal College of Surgeons at Edinburgh, Scotland. He is a member of the editorial boards of the journals Pediatric Dentistry, and Oral Surgery, Oral Medicine, Oral Pathology and Oral Radiology. He has many years of experience in medicine and dentistry, especially caring for medically compromised children. He has been lecturing nationally and internationally sharing his expertise in the field of pediatric oral medicine.
Pediatric Oral Medicine

This seminar will discuss the most common radiographic and soft tissue lesions affecting infants, children and adolescents.

Using case-based presentation format, the seminar will cover the entire spectrum of pediatric oral medicine. Topics such as oral pathology, imaging and systemic conditions impacting the practice of pediatric dentistry will be addressed.

After attending this seminar, participants will be able to:

- Understand the importance of “building” a differential interpretation in radiology;
- Learn the most common radiographic and soft tissue lesions in infants, children and adolescents;
- Learn the indications of CBCT within the discipline of pediatric dentistry;
- Understand the importance of radiation safety in pediatric and adolescent dentistry;
- Explore the most important oral manifestations of systemic diseases in children.

Lecture is worth 6 hours of CEUs

Registration deadline for CE and hotel is March 4, 2018.
