

Mediasite Support

- Rooms D3-3, D8-46 and C1-9 are equipped with permanent recorders that can be scheduled to start and stop automatically based on a schedule. All other rooms require our mobile Mediasite recorder to be brought in and controlled manually by the Instructional Support staff.
- In order to appear in the video feed, the presenter should stand directly behind the lectern.
- To capture audio, the presenter should wear the lavalier microphone, whether or not the presenter is recorded by the dedicated recorders or the mobile Mediasite recorder.
- Mediasite will now capture all sources projected (dedicated PC, laptop, document camera, DVDs, and markings made on the Smart Podium). In D8-46, Mediasite captures video of the lecturer and what is projected on the RIGHT projector (when looking towards the front of classroom).
