

**Class of 2014**  
**Comparison of Student Benchtop Outcomes**  
**on Mock Board and Florida Board Exam**

**DEN 8960L: Clinical Examination 2 (Mock Board Examination) Part I**  
**October 2013**

**Endodontics**

Total of 48 failures.

- 2 students failed #8 only.
- 40 students failed #14 only. \*See note below
- 5 students failed both #8 and #14.
- 2 students who have a "0" for access on anterior started on the wrong teeth and were allowed to remediate during the mock board session. They successfully remediated #8, but have a fail grade for #14.

\*Administrative Note: This was the first year we used the Accidental model and the primary issue was the access opening on tooth #14. Many of our students failed the mock board and this was not a problem previously with the other model for the access prep. The Accidental molar is much more constricted at the cervical portion than the previous model which resulted in the student's poor performance on the mock board.

Endodontics allowed the students to **retake** the exam after a one on one practice session. Only students who fail again would need to remediate.

All students remediated by December 12, 2013

DEN 8960 -Clinical Exam II Endodontic Summary Class of	# Students	Passed	Failed	Passed 1 <sup>st</sup> Remediation	Passed 2 <sup>nd</sup> Remediation
2009	82				
2010	81				
2011	81				
2012	84				
2013	80				
2014	81	33	48*	48	

**Prosthodontics**

Total of 25 failures

- 11 students have failed all preparations
- 6 students have failed the anterior crown preparation (# 9)
- 8 students have failed the bridge preparation (#3 to #5)

DEN 8960 -Clinical Exam II Prosthodontic Summary Class of	# Students	Passed	Failed	Passed 1 <sup>st</sup> Remediation	Passed 2 <sup>nd</sup> Remediation
2009	82	N/A	N/A	N/A	
2010	81	52	29	N/A	
2011	81	60	21	18	3
2012	84	25	59	49	10
2013	80	71	9	7	1
2014	81	56	25	16	

**North East Regional Board of Dental Examiners (NERB) Summary**  
December 2013

**Overall: 13 Students had failures (4 failed both Endo and Pros sections)**

**Endodontics**

Total of 9 failures  
5 had endo failures only

**Prosthodontics**

Total of 8 failures  
4 has pros failures only

University of Florida College of Dentistry  
Course Debriefing Summary  
DEN 8303, Advanced Radiologic Interpretation

---

**January 16, 2014**

Present: S. Nedrud, R. Kalra, T. Hensley, H. Freymiller, S. Patel, M. Nair, N. Sposetti, R. Katkar, G. Childs

Review of course evaluation: 7 respondents – Mean range 3.9-4.3, overall score = 3.9

**Syllabus:**

No recommendations. Students understood all expectations in the course.

**Course content:**

Students felt the course was very comprehensive.

**Course materials:**

- Students liked the Documents folder set up. Each folder included objectives, reading assignment, handout(s) and the Mediasite link .
- Some students preferred the Mediasite video recordings and others preferred the Camtasia video recordings.

**Teaching Methods:**

- Students liked that the course was online. It made it easier for students to review videos while on rotations and to set their own pace and go back and review as needed.
- Suggestion to go over more cases step by step in the lectures and used Dr. Katkar's example as a best practice.
- Students felt comfortable with the communication with faculty especially since Outlook was used. It made certain all the dental.ufl.edu accounts were contacted.

**Evaluation:**

- Students felt the quizzes should be due at different times instead of one
- Students would have preferred higher quality images on the final, however, it replicated the National Board images which were of the same quality and could not be manipulated
- Students felt the overall grading of the course was fair
- Students like the pacing between assignments and exams

**Summary of Course Recommendations:**

- Re-sequence course before Advanced Differential Diagnosis
- The laser pointer and mouse were difficult to see in the lectures. If this could be enlarged it would help with students watching the lecture videos.
- Provide more examples of boney window verses soft-tissue window and of lesions from different angles.
- 

**Summary of IT and Instructional Support Recommendations:**

- These 4DN students reported that increased security via VPN access set up and checking they understand UF Copyright rules for every document download) now poses too many hurdles so they use ECO much less frequently than prior to VPN. The question was raised why ECO was under more security levels than E-learning.

- ECO email is currently authenticated with MyUFL. Many students email accounts are not updated to the dental accounts although some have them forwarded to the Outlook account. The send has no way of knowing if the communication is being received but can opt to have the communication posted to the announcement section of ECO. Explore methods of how ECO emails could be updated.
