6213		
6412		
6415		

6415	Amalgam core build up currently taught in 6415 by Dr. Nery Clarck as three hours	Amalgam core build up will be removed to 6408 exactly same three hours
------	----------------------------------------------------------------------------------	------------------------------------------------------------------------

Dr. Haddix will cover the restoration of endodontically treated teeth in DEN 6415 (3hrs lecture) including the review of all the concepts and steps as well the decision making component; eliminating the need for him to give this lecture in Dr. Pilleggi's course (DEN 7433). Dr. Kerdani will give a lecture on the fabrication of the Cast Post & Core Pattern and provisional restoration followed by a laboratory exercise. A final lecture will be given by Dr. Kerdani followed by a cast post & core pattern completion, fitting, evaluation and cementation. Review exam questions and course evaluation followed by completion of the cast post & core fitting, evaluation and cementation.

## **Goals and Sustainability of Small Group Case-based Learning**

### **Issues for Consideration**

Group selection (alphabetically or by design)

Group scheduling (regular time reserved or managed among other courses)

Facilitator Sustainability, Development, Recruitment

Case Administration (post HRSA grant)

Facilities-rooms

Supplies (can they be moved from paper to online?)

Consideration for IPE opportunities

Case complexity to increase across the curriculum?

Case Assessment (Formative/Summative)
