

**University of Florida College of Dentistry
Course Debriefing Summary
DEN 6416C, Basic Science Review**

May 16, 2015

Present: H. Perez, W. Baldock, C. Chiafair, S. Abbas, K. Kidwell, K. Gallick, R. Shukla, G. Childs, Drs. D. Culp, J. Aris, K. Rarey

Debriefing Purpose: New Course Director, Dr. Nonabur (unable to be present)

Review of course evaluation: respondents = 55, Mean = 3.13

Syllabus:

- No suggestions

Course content:

- Head and neck areas were well covered and students felt it would help them in clinical patient care. However, they suggested this course also review some of the basics, such as anatomic innervations, heart, lungs, kidneys and sympathetic and parasympathetic if this was a Board Prep Course. There was no need to go into detail in fetal development.
- Pharmacology was briefly covered on the board in terms of side effects such as dry mouth.
- Students reported that the Board content of “Dentistry Questions” was about 30%.

Course materials:

- Students reported that Dental Decks, old Board exams, the USMLE Step I Study Guide and the Dental Mastery App were the best preparation materials for studying.

Teaching Methods:

- Student did not feel the format of the quiz questions helped them in their Board preparation. Some felt the material to cover was so overwhelming it added to their stress level with other courses this semester.
- Students reported the lecture/labs in Advanced Head and Neck were excellent.

Evaluation:

- The students felt the quiz question formats are very different from the NDBE questions. They described them as straight forwarded, “you either knew them or you didn’t”.
- Some students preferred quizzes be on online (Canvas or ExamSoft), and others suggested to conduct quizzes in a lecture room as opposed to the Testing Center and allow students to view all the questions and answers in review mode.
- Students reported quiz question formats were not representational of what was on the boards.
- Students asked if a brief review and/or guidelines could be provided before each quiz.
- Students felt quizzes were de-motivational in studying for the boards.
- Some students reported a significant number of testlet questions on their Board and others none or one. It was suggested to have more on the practice quizzes.
- Make the quizzes and course S/U rather than graded.

Summary of Recommendations:

- Use the First-Aid book essential topics, testlet formats and older board questions to construct quiz questions.
- Dr. Culp said he will ask the instructors next year to create questions that do not dwell on the details but rather on basic material.
- For the review make all questions viewable.
- Make the course S/U rather than graded.
- It was suggested instructors add a rationale to appear on the quiz review.
- Align the quizzes with the Board breakdown of question topics.
- *Administrative Note: Re-review Exam Master materials*

Spring 2010 - 2016 Course Evaluation Summary

Course #	Course Name	Course Mean / (Respondents) 2010	Course Mean / (Respondents) 2011	Course Mean / (Respondents) 2012	Course Mean / (Respondents) 2013	Course Mean / (Respondents) 2014	Course Mean / (Respondents) 2015	Course Mean / (Respondents) 2016
