| <b>Class of 2021 Concerns – Megan Guerra</b>           | 1. A few people in the class have had extra SOS rotation days added to their axium schedule and were wondering if they could be removed because they no longer need them.   |
| <b>Class of 2022 Concerns – Catherine (Jenny) King</b> | 1. Students are desperate for transparent and clear outlines of clinical requirements. There is much confusion among our class about endo requirements, radiology requirements and specifically SOS requirements (the Team Clinic requirements are clear). The class is asking for written updated requirements as many students have been told (or individually emailed) different things. Students feel that it is impossible to reach requirements that are unknown to them. |
| <b>Class of 2023 Concerns – Drew Anderson</b>          | No concerns   |
| <b>Class of 2024 Concerns – Andrea Nazari</b>          | No concerns   |
| <b>Future Meetings</b>                                 |   |
| <b>Adjournment</b>                                     |   |
