

# HOME RECORDING TIPS

a brief guide on best practices for home recording and recommendations for equipment.

## LOCATION

Find a quiet, well lit room.

1

## LIGHTING

Face your light source--we want to see your face clearly!

2

## CAMERA PLACEMENT

Here is what you should and should not do when placing your camera:

### HEADROOM

There is far too little room between the top of the head and the top of the frame.

3

### EYE LEVEL

Camera has been placed above eye level, breaking eye contact with audience.

### BACKGROUND

Background is busy, taking focus away from the presenter.

### EYE LEVEL

Camera is eye level, providing eye contact with the audience.

### HEADROOM

An appropriate amount of space is left between the top of the head and the top of the frame.

### BACKGROUND

Background is clean, ensuring the focus is on the presenter.

## SOUND

4

Webcam audio may suffice, but if you need to record remote lectures frequently, consider purchasing a dedicated USB microphone.

## SCREEN

5

Capture your screen via Zoom, the Mediasite Desktop Recorder, or Google Hangouts.

# RESOURCE RECOMMENDATIONS

---

## USB WEBCAMS

AUKEY
